Re: Reply Comments for DA 12-1863, IB Docket No. 12-340; RM-11683

Dear Chairman Genachowski:

Thank you for the opportunity to submit comments in support of LightSquared's License Modification Application. I have followed the company's dealings with interest and I believe that LightSquared's new network could dramatically change access to wireless services for the historically underserved.

By introducing a new major wholesale provider into the market, LightSquared's planned network would offer more voice and data services and options to customers. Also, more competition on wholesale costs by the major carriers would trickle down into lower retail costs for end users.

As the comments filed in these proceedings reveal, there is almost universal agreement that the FCC should facilitate the use of limited spectrum resources and move forward with LightSquared's proposal to bring a significant chunk of spectrum to bear in the provision of a wholesale-only nationwide 4G mobile broadband network. As many parties noted, LightSquared's wholesale provision of this service opens up this spectrum for not just one competitor, but almost an infinite number of current and potential players in the wireless market.

I strongly urge you to approve its request to modify its license.

Thank you for your time and I appreciate your consideration.

Sincerely,

Gayle Holliday
President, G & H Consulting, LLC
